It is characterized by its tall and pointed architecture, typical of Hindu architecture, and by the towering 47-metre-high (154 ft) central building inside a large complex of individual temples. Prambanan temple compounds originally consisted of 240 temple structures, which represented the grandeur of ancient Java's Hindu art and architecture, and is also considered as a masterpiece of the classical period in Indonesia. Prambanan attracts many visitors from around the world.

Ullen Sentalu Museum

The name Ullen Sentalu is taken from the philosophy of the Javanese language, namely ulateng blencong sejatine tataraning lumaku. The philosophy comes from oil lamps, which provide lighting during puppet shows. The Ullen Sentalu Museum tells a lot about the civilization of the Kingdom of Mataram which was divided into palaces in Solo and Yogyakarta.
